

NIHR | National Institute for Health and Care Research

Firm foundations with scaffolding to help: Building research into your clinical career supported by the Multi-Professional Practice-based Research Capability Framework.
An INSIGHT webinar.

Background

The INSIGHT Programme is for health and social care students and professionals at an early stage of their career, helping equip them with the skills and training to undertake research and combine research with practice.

Webinar

Join **INSIGHT North East and North Cumbria** and **INSIGHT Yorkshire and Humber** for our joint webinar, which aims to help you utilise a national resource to support you in including research in your role from the outset, regardless of where you practice. We will walk through the entry level domains of the framework and think about how you can relate it to your clinical practice.

Details

When: Tuesday July 8th

Where: Online
